

DONOR REFERRAL LINE

1-800-344-8916

Organ donation: call within ***one hour***
on all ventilated patients with any of the following:

Glasgow Coma Score \leq 5

Absence of one or more brainstem reflexes:

pupils fixed, no corneal reflexes, no cough, no gag, no spontaneous movement or response to painful stimuli, no spontaneous respirations

Anticipated end-of-life discussions

family seems ready to discuss end-of-life options, goals of care or palliative care meetings are scheduled, family considering comfort care

- ▶ **Making a referral does not change the treatment goals.**
- ▶ **Contact donation agency prior to terminal extubation or initiation of comfort measures.**
- ▶ **It is critical that the opportunity for donation is presented only by donation agency staff.**

Eye & tissue donation: call within ***one hour*** of cardiac death even if the patient was previously ruled out for organ donation.

Cascade
Life Alliance

Your timely referral ensures collaboration to preserve your patient's opportunity for donation and to support a family's right to be informed in a timely manner.

Preserving Your Patient's Donation Opportunity

- ▶ Continue support and treatment – good patient care is good donor care.
- ▶ Contact donation agency prior to terminal extubation or initiation of comfort measures.
- ▶ Allow donation agency staff to initiate donation conversations with family.
- ▶ Call 24/7 with questions or updates to the plan of care, neuro status, or family decision making.
